Canon Safety/RHI Group

IMPROVING SAFETY SINCE 1987

THE CULTURE, THE DATA, THE PEOPLE.

THAT GET EVERYONE HOME SAFE. HSE SERVICES · H2S SAFETY · TRAINING · GAS DETECTION BUILT ON A MEASURED, PEER-LED SAFETY CULTURE.

1.800.553.2964 · CSRHIGROUP.COM

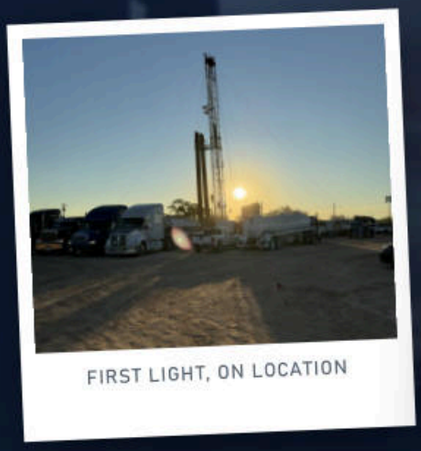

1987

KILGORE, TEXAS

THE CANON CREED

WE SHOW UP FOR EACH OTHER. WE DO THE RIGHT THING WHEN IT'S HARD. WE OWN WHAT'S OURS. WE SPEAK UP WHEN SOMETHING'S WRONG. WE LEAVE EVERY LOCATION SAFER THAN WE FOUND IT.

THAT'S NOT A POLICY — THAT'S WHO WE ARE.

FIRST LIGHT, ON LOCATION

READY TO ROLL, EVERY MORNING

PROUD OF WHERE WE WORK

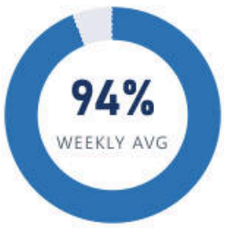

HOW WE'RE DIFFERENT

We don't just train safety. We measure it — every day.

Most safety vendors hand you a binder. We run a live compliance engine. Field forms are digitized, reviewed, and rolled up into the **Owl Hub** — so crews, supervisors, and clients can see, in real time, that the work is actually getting done.

SAFETY COMPLIANCE

PROGRAM WEEK · LIVE

Daily H2S Forms	96%
Trailer Inspections	92%
Trailer Readiness	98%
Training Matrix & Certs	91%

ILLUSTRATIVE — THE LIVE HUB AUTO-POPULATES FROM DAILY FIELD SUBMISSIONS.

DIGITIZED FIELD FORMS

H2S checks, trailer inspections and JSAs captured on any phone — offline-ready for no-signal sites.

O.W.L. SELF-REVIEWS

Observe · Win · Learn. Crews log what they saw and what they'd fix — turning near-misses into habits.

LIVE COMPLIANCE DASHBOARDS

Daily roll-ups by crew, trailer and topic — visibility clients can actually verify, not just trust.

RECOGNITION THAT STICKS

Good calls from the field get named and shared — so filling out the form becomes second nature.

DATA STARTS AT THE GATE

Live H2S condition status posted on every location — readings captured in the field, not filled in after the fact.

RED-ZONE MONITORING, VISUALIZED

Canon Safety exclusion-zone aerials — authorized personnel only, and everyone can see the line.

THE OWL PROGRAM · 12-WEEK ROTATION

WHAT IS AN OWL? NOT A TITLE. A RESPONSIBILITY.

01 **ONE OWL OWNS ONE WEEK**
Selected for a single 12-week rotation to lead the morning safety meeting — the topic, the setup, the delivery, and the follow-through.

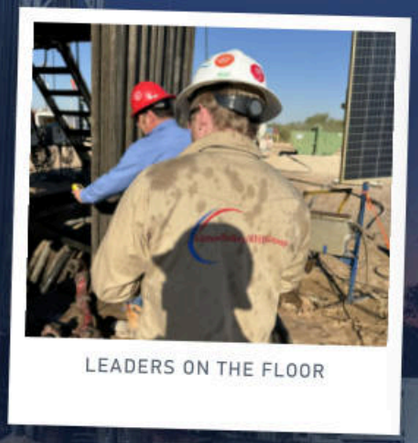

02 **LEADERSHIP PAIRED WITH A RULE**
Each week pairs a leadership theme with one PSMS / Life-Saving Rule — culture and technical safety, together.

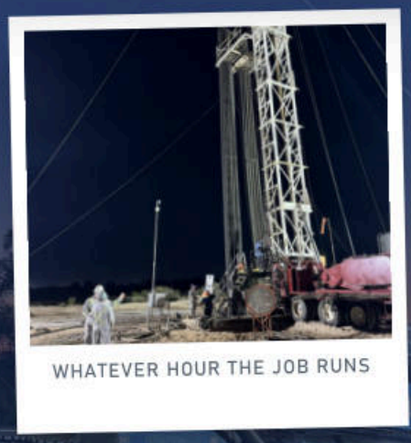

03 **IT COMPOUNDS**
Twelve weeks, twelve leaders, every crew member accountable to the next. Safety stops being a department.

Observe	Win	Learn
SEE THE HAZARD	MAKE THE SAFE CALL	SHARE IT FORWARD

WORKING AT HEIGHT — DONE RIGHT

LEADERS ON THE FLOOR

WHATEVER HOUR THE JOB RUNS

TRAINED INTERNALLY · REINFORCED WEEKLY

The 12 Life-Saving Rules.

The PSMS topics every Canon crew is trained and tested on — digitized as controls they can pull up on-site, any time.

01

ENERGY ISOLATION

Verify isolation & zero stored energy before work.

02

BREAKING CONTAINMENT

Manage exposure to energy & hazardous substances.

03

LINE OF FIRE

Keep yourself and others out of the line of fire.

04

MOBILE EQUIPMENT

Separate people from moving equipment; use spotters.

05

CONFINED SPACE

Isolate, test the atmosphere, attendant & rescue ready.

06

DRIVING

Seatbelt on, phone down, fit and within the limit.

07

HOT WORK

Control flammables and ignition sources; fire watch set.

08

BYPASSING CONTROLS

Use safety-critical equipment and procedures as designed.

09

EXCAVATION

Authorized; utilities located, de-energized or protected.

10

SAFE LIFTING

Lift plan in place; never walk under a suspended load.

11

WORKING AT HEIGHT

Protect against a fall; inspect and anchor before use.

12

WORK AUTHORIZATION

Permit confirmed, hazards controlled, safe to start.

✓ TWELVE RULES. ZERO SHORTCUTS. EVERYONE GOES HOME.

RULE 09 IN THE FIELD — EXCAVATION WITH A SPOTTER

UTILITIES LOCATED & MARKED BEFORE THE DIG

ATMOSPHERE TESTED — ALWAYS MONITORED

THE
GOAL IS
SIMPLE.
EVERYONE WATCHES THIS
SUNSET FROM HOME.

WHAT WE DO

Specialized services, backed by the same standard.

The culture is the difference — but the work is real. From on-site H2S coverage to the instruments your crews wear, every service runs to the Canon standard.

SPECIALTY

BENZENE & NORM

Awareness, monitoring and exposure control for benzene and Naturally Occurring Radioactive Material — where most vendors stop, we specialize.

SPECIALTY

ATMOSPHERIC MONITORING

Continuous gas testing and documentation for confined space, breaking containment and hot work — the data trail auditors want.

H2S ON-SITE SAFETY

Certified supervisors, 6×6×6 / 8×8×8 safety trailers, cascaded breathing air, SCBA/SABA, and contingency planning for critical operations.

GAS DETECTION PRODUCTS

Sales, rentals, calibration and fleet management of Honeywell / BW multi- and single-gas detectors and docking stations.

REGULATORY TRAINING

40+ OSHA, H2S, Veriforce SafeLand & SafeGulf, HAZWOPER and First Aid courses — in our classrooms, at your site, or online.

OQ & COMPLIANCE

Operator Qualification programs, covered-task tracking and program development that stands up to audit.

THE TRAILER FLEET, READY TO ROLL

ON LOCATION WITH THE RIG CREW

CASCADED BREATHING AIR, INSPECTED DAILY

H2S CONDITION SIGNAGE, EVERY SITE

GAS DETECTION PRODUCT LINE · SALES · RENTALS · CALIBRATION

The instruments we put in your hands.

Factory-authorized sales, rentals and calibration — sized to your job, bump-tested and documented before they leave our shop.

RKI INSTRUMENTS

GX-3R

Ultra-compact 4-gas built for comfortable, dependable everyday protection.

GX-3R PRO

Expanded gas options, color display and rugged construction — up to 5 gases.

GX-FORCE

Rugged pumped multi-gas for personal protection and confined-space entry.

PUMP ATTACHMENT

Adds remote-sampling capability to compatible RKI monitors.

DOCKING STATION

Automates bump testing, calibration, charging and data management.

HONEYWELL BW

BW CLIP

Simple single-gas for continuous protection with minimal maintenance.

BW CLIP4

Wearable always-on 4-gas in a compact, easy-to-use design.

MICROCLIP XL

Slim rechargeable 4-gas with dependable alarms for all-day wear.

MAX XT II

Multi-gas with integrated pump for pre-entry and confined-space work.

INTELLIDOX

Automated docking for testing, calibration, charging and compliance records.

GAS CLIP TECHNOLOGIES

MGC

Compact 4-gas for continuous personal protection and routine atmospheric testing.

MGC SIMPLE

Easy-to-use multi-gas built for dependable daily monitoring with minimal setup.

MGC PUMP

Pumped multi-gas for remote sampling, confined-space entry and pre-entry testing.

EXTERNAL PUMP

Portable sampling pump for tanks, pits, vessels and hard-to-reach areas.

DOCKING STATION

Automated bump testing, calibration, recordkeeping and maintenance.

BENZENE? ASK ABOUT THE RKI GX-6000. Benzene-specific PID monitoring (0.01–50 ppm) with dual-PID capability and a 300+ compound VOC library — available for specialty applications.

SALES · RENTALS · CALIBRATION ACROSS ALL THREE LINES — FULL SPEC SHEETS ON REQUEST

TRAINING & CREDENTIALS

40+

REGULATORY COURSES

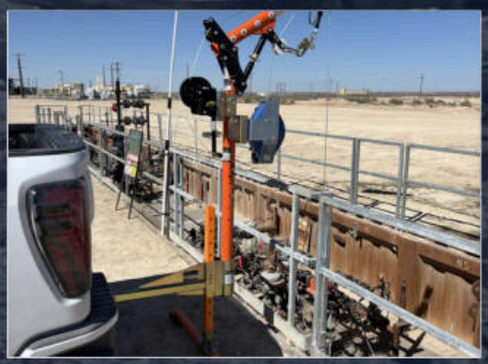

All Canon instructors are **authorized OSHA Outreach Instructors**. Full course catalog — with expirations, lengths and CFR references — available on request.

AUTHORIZED & ACCREDITED THROUGH

OSHA Authorized Outreach Training Instructor · MEDIC First Aid · ENERGY SAFETY CANADA · SafeGulf · veriforce · NCCER · OQSG · ISN · hsi Approved Training Center

POPULAR COURSES

LOCATIONS & CONTACT

Founded in Kilgore, Texas — 1987.

For nearly four decades Canon Safety / RHI Group has served the oil & gas industry with skilled safety supervisors, training, compliance and technical products. Five Texas locations — and crews across West Texas and New Mexico — put the culture within reach. Training now runs from our Midland office.

WHEN YOU CALL, THIS IS WHAT SHOWS UP — READY.
